

## The Beginning of The End!

for well over a century we live under oppression, denied of any form of self expressions; humiliated as second class citizen, doing whatever we were told, performing humiliating jobs given. But however much you mould, whatever services you render, a parasite knows no limit and as a parasite ultimately it will kill its host unless it is dealt with. Anyone who suffers from a parasite knows too well this, if only he has the means and resolve to get rid of the scourge before it is too late.

Tigrai has voiced its resolve yesterday. The people have resoundingly voiced and voted to steer their destiny, no force, no plot, no shenanigans would stop this. The Oromos, Welaytas, Sidama, Benshangul, Kemant, Agew, Afar, Somali, Gamos, etc will do the same sooner than later.

The burden of the yoke has gone far the oppressed people could no longer bear it any more.

They were crushed to submissions and forced to accept assimilation. If only it ended there; they would have carried the burden of the yoke and move on. But once they were compelled to assimilate they were denied any basic dignity to lead a sort of life as second class citizens.

In a twisted irony they were made to believe that they were not only subjects but designed members of the ethnic group forced to assimilate and adopt its language, culture and psychological make up to please and insure the masters, but they were constantly threatened if they dear break and leave their adopted psychics to assume their own identities destiny.

Thus, nations and nationalities in Ethiopia were trapped without any exit but taken for granted

Not anymore!! It is better to die than to have no options and decide how to live one's own life, within the means one has at own disposal. The Amhara elites cannot and will not force oppressed nations breaking free. Free at a last free!!

Oppressed nation will be free.

Those who devour beyond their bellies could hold will expose their bellies for others to devour
