

Crocodile Tears! My Foot!

I must be rudely awakened from a daylight dream! Since when has the Eritrean Dictators advocate human rights for Eritreans, be it a home or abroad, and/or for that matter for anyone on this planet?

Now to complain and bring to the attention of the UNHCR that an injustice against Eritreans is perpetrated by supporters of the TDF, as if they themselves did not scorch to Earth the camps the Eritrean refugees lived for years in Tigray; as if they did not drag the Eritreans refugees by the scarf of their necks and spirited them to Eritrea to execution; as if they did not violate an international law by crossing over and desecrate the refugee's safe haven; they now found it convenient to use for their political ends a real or imaginary injustice inflicted upon refugees, who in the first place fled from their brutal and dictatorial claim of the state of Eritrean.

Let us state this clearly. An injustice for one (Eritrean) is an injustice for all. Innocent and vulnerable Eritreans have to be protected by everyone where ever they have sought refuge. If indeed, there are rumours that any Eritrean is mistreated, injured, imprisoned for no other reason except his or her identity as Eritrean that needs to be investigated and action on perpetrators brought to account.

We know; Isaias Afewerki knows no limits to operate and sustain his reign by all means. There are many spies and killing squads assigned to infiltrate throughout Ethiopia, Sudan, Uganda, Kenya and Tigray. It will not be surprising if some of dark horses operating under the cover of refugee

status are now brought under control by TDF. But said, even if these tags are apprehended, care must be taken to treat them as humanly as possible and brought them to justice for all to see, and justice is served.

The irony is when the UNHCR calls for international investigation for atrocities and human rights violations, be it for refugees and civilians in Tigray, you guessed it right, Eritrean, Ethiopia and some African nations rejected and voted against the resolution. ፈስ ያለው ዝላ አይቸልም:

Why then this cry foul, tears of a crocodile, when the dictators could not run the full course of voting for the cause of human rights? They felt refugees caused could be used as a napkin to be used on a dinner table: to help one to relief throat pain so as clear the way to eat more. It is only because it would give them a breathing space to create more havocs; as havoc is the only dish on the menu they wanted the public to be fed in a Facebook Restaurant.

Now, Tigray is on the march, they felt they could not stop. But try one more chance; they have sent their foot soldiers with as many flyers as they possibly can print, hoping to attract the attentions of some gullible audience. For eight months, they trampled civilian rights and repeatedly gave deaf ears to international organisation to stop their barbaric acts. They are on the death row, cup- de- sac; the end of the road, but felt they can appeal to look like they are champions for human causes. Liars! Who do they think they are dealing with? Fools? They are. We are not!
